

Physical inventory reports in SAP

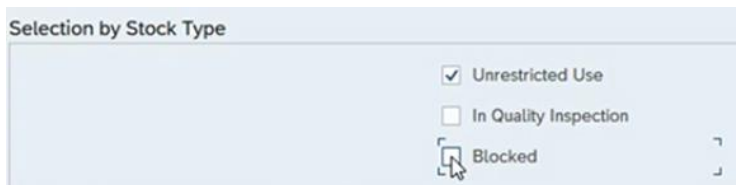

Like in other submodules of materials management, the physical inventory area has robust standard reports available.

Let's run the display physical inventory data for material report. To do this, we'll enter transaction code MI23.

A screenshot of the 'Database Selections' screen in SAP. It shows input fields for Material (rm18), Plant (1710), Storage Location, and Batch, each with a 'to' field and a selection icon.

This brings us to the selection criteria screen. This report can be as specific or as narrow as we like. First we'll enter our material, RM18. Next we'll enter our plant, 1710. Now we'll scroll down.

A screenshot of the 'Selection by Stock Type' screen in SAP. It shows three checkboxes: 'Unrestricted Use' (checked), 'In Quality Inspection' (unchecked), and 'Blocked' (unchecked).

In the selection by stock type area, we want to run this report only for unrestricted use stock. So we'll uncheck in quality inspection and blocked. Now we could execute this report.

Material		Material description								
Plnt Name 1										
SLoc	Batch	S	Special stock descr.	Assignmnt	STy	PIB	PhyInvDate	Current Stock	BUn	Curr. Period
RM18		RAW18,PD								
1710 Plant 1 US										
171B					1			0	PC	To Be Executed
171C					1		04/06/2022	7,990	PC	Completed

We can see in the header fields that this report is for Raw Material 18 at plant 1710. Let's look at the row for storage location 171C. This row is stock type one, which is valued stock. The physical inventory for this stock was conducted on April 6th, 2022, and is 7,990 pieces. The final column of this row shows that the physical inventory has been completed

for this period. This report has a nice feature in that we can see the value of the stock in the system.

Physical Inventory Data: Display Stocks and Values

Storage Location Stock

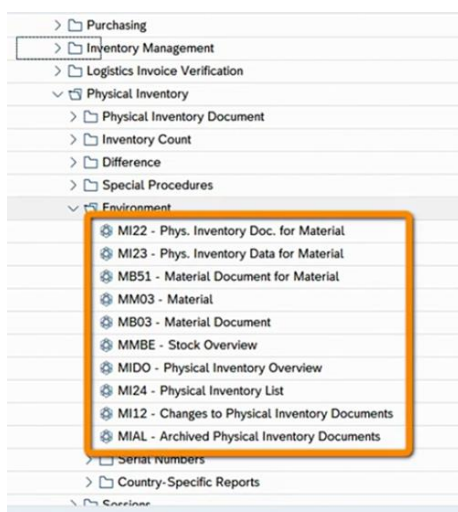

Material RM18 Plant 1710 Storage Location 171C Date in Phys. Inv. 04/06/2022

Plant 1 US Raw Materials

RAW18,PD

Stock Type	Period	Unrestricted	BUn	Total Value	Crcy	Blocked	Active	Completed
Plant Totals	Curr. Period	7,990	PC	5,353.30	USD			
	Prev. Per.	0	PC	0.00	USD			
	Previous Year	0	PC	0.00	USD			
Unrestr. Stock	Curr. Period	7,990	PC	5,353.30	USD			X
	Prev. Per.	0	PC	0.00	USD			
In Qual. Insp.	Curr. Period	0	PC	0.00	USD			
	Prev. Per.	0	PC	0.00	USD			
Blocked Stock	Curr. Period	0	PC	0.00	USD			
	Prev. Per.	0	PC	0.00	USD			

To do this, we'll double click the line item for storage location 171C. This brings up our display stocks and values pop up. The blue rows show our plant totals. The current period has 7,990 pieces at storage location 171C for a total value of \$5,353.30. The yellow rows show specific storage location information by period. We can see that we have 7,990 pieces of this raw material compared to zero in the previous period. This is only one of the standard physical inventory reports in SAP. Let's look at some of the other available.

To do this, we'll close this pop up. We'll press exit. Exit again. This brings us to our SAP easy access screen. Now we'll navigate using the menu tree. We'll expand the logistics folder, materials management, physical inventory, and environment. There are some really helpful list reports in this folder that help us dig into physical inventory. Specifically, the physical

inventory overview report with T code MIDO is really useful when we have a lot of physical inventory data and we need to zoom out and get a higher level view of all of it.
